With working on this project I learnt the system which works at the backend for payment gateways.

- Integrating multiple payment processors (Rosespay, safexpay, Wonderlandpay, Avante)
- Studied PCI-DSS in detail.
- Modules for (Merchant, Finance, Operations, Sales, etc)
- Implemented fraud Protection

## Web Application Developer

Jotix Technologies

Apr 2016 - May 2017 (1 year 2 months)

## Education

### The University of Lahore

Bachelor's degree, Computer Science

2011 - 2015

"Research Group" web portal the reason to increase knowledge among people, people being on this research group will know about the research work done by different groups. The Research group can show their research based work globally, faculty will provide their record for their delivered services and work at a place. Student and teacher portal will lessen the communication gap between them. Teachers will be provided ease to do their work more comfortably and Students can get all information easily from a single platform.
