Myself **Nidha Mol O A**, Senior Engineer with 5 years of Automotive Embedded Software development experience in Robert Bosch Engineering and Business Solutions, Bangalore, and 10 months internship at National Aerospace Laboratories. Along with 2 years of experience in teaching Engineering students at BenchMark Engineering Academy, Kerala Cochin.  I did my master's (M Tech) in Electronics and communication from India.

My passion is teaching and I would love to work in an academic environment. Also in past times I was responsible for Complete software Integration of VW Projects for Park-Pilot Projects (based on USS) including AUTOSAR Upgrade and Basic Testing of Software. Mentored graduate freshers as per team and business requirement. Periodically challenge them with new assignments to make them ready. Managed multiple technical projects simultaneously, in various phases of development. Led project teams to achieve results on scheduled and on budget and involved Project Planning and coordination.

I'm well organized, detail-oriented, and able to prioritize effectively to manage conflicting demands in a fast-paced work environment. I have exceptional computer skills, strong analytical, research, and time management skills, and a very high degree of commitment to my work.

I am confident that my experience and education has prepared me for this position and my unique abilities can contribute to your objectives.
