Project Details:

Company Name : Ford India Pvt. Ltd., Maraimalai Nagar, Chennai.

Team Size 2

Title : Reducing the cost of cubing in the manufacturing of engine cylinder blocks

Description : This project aims at reducing the cost of cubing operation in the manufacture of engine cylinder head. To find out whether the cubing operation, which is currently being done by the supplier can be incorporated in the existing in-house production facility, a stopwatch time study of the operations in the manufacturing line was conducted. The current balance efficiency was calculated and GPSS simulation was used to find the system statistics. A new balance proposal using Flexible Line Balancing (FLB) software was proposed.

Experience 1:

Company Name : Arun Plasto Moulders (India) Pvt. Ltd.
Location : Chennai
Designation : SAP B1 Functional Consultant
Experience : 1 Year 2 Months (3,June 2013 to 22,September 2014)
