Accomplishments :

Course   : **Certificate for Air Conversion Course**

             : From **Sabre Travel Networks**, Kingdom of Bahrain.

Academic Project:

Course   : Master of Computer Application (MCA)

Title   : Case Study on Intrusion Detection In Wireless Ad-hoc

             Networks(mini project)

Description   :

With the evolvement of the Internet over the last few years, the need for security has been rising with it mainly due to the openness and connectivity nature of the web, people and organizations are faced with more challenges every day to secure their data and all other assets of value to them. No system is totally secure. Any security procedures should be undertaken with that in mind. There will always be threats and actual intrusions. The ultimate goal should be minimizing the risk and not eliminating it.

Course   : Master of Computer Application

Title   : Find And Park (major project)

Technology   : ASP.NET

Description   :

A major problem facing our metropolitan cities is the traffic problem. The proposed system is a new approach to solve the parking problem of metropolitan cities. Using this web portal one can reserve a spot(in the parking area they needed) through their mobile phones or they can use website for reservation. Actually **FINDnPARK** is an complete online parking management system for metropolitiancities.This system will work for Spot Finding of Vehicle Parking Space for Metropolitan Cities
