Dear Sir/ Madam,

I have a Diploma in Electrical Engineering and some of the courses I took include project planning management using primavera (P6), AutoCAD. I also have over four years of experience working as an Electrical Engineer (Planning & Project Control), where I acquired many skills that make me the perfect candidate for this position.

I have excellent leadership and communication skills with the ability to lead my team in a professional and efficient manner. I have experience creating schedules, assigning tasks, doing reviews, conducting interviews and hiring and training new employees.

I had worked with world's most top EPC Contractors- Bechtel, Tecnicas Reunidas, Daelim, Technip Energies, Samsung, etc.

I have excellent problem solving, analytical and computer skills and I have the ability to troubleshoot and find the solution to any problems that arise. I believe that my management experience combined with my education and skills make me the best applicant for this position. I am reliable, trustworthy and always strive hard to be the very best. I have included references in my resume along with a complete look at my work background.

I hope to meet with you soon and you can reach me by calling (973)-3530 1569.

Sincerely,

Subin Sunilkumar
