

CURRICULUM VITAE

PERSONAL DETAILS

Name	Ali Hussain Al Mandeel
E-mail	a.mandeel@gmail.com
(mobile)	(+973) 3998 3990
Nationality	Bahraini

OBJECTIVE

To hold a position that fits my competencies.

EXPERIENCES

Digital Marketing

As currently holding the position of Senior Manager of Paid Ads in Raqtan Group I can say that I have covered all the areas of digital marketing starting from the Paid ads, email marketing, social media marketing and video marketing.

eCommerce:

As Manager eCommerce New Services in Gulf Air, I am responsible for implementing any new service on gulfair.com. This means dealing in detail with the latest eCommerce trends in the market. Beside that I am handling the social media channels and the online marketing aspects (working with 3rd party vendors).

Project management:

As a project leader I have been managing many web projects in my previous job in ePromoseven and in my current position. In most of these projects I was in close contact with the customers' project management and project group - including end-users. A crucial part of the management has been to enhance the performance ways we develop the project, give each team member the task that fits his capabilities and to be a direct part of the actual website or multimedia development team.

Training:

As a **CBT Specialist (CTP (CIPD) certified)** in the training department, my main rule is to design and develop instructional courses for Gulf Air (Pilots, Engineers and Cabin Crew). Analyzing training needs and training development is a part of my everyday life.

Website & software development:

Web development is something I practice almost every day.

I have been a web developer on a lot of projects and have been part of building Bahrain Stock Exchange Portal was one of my best achievements in my web development career. I'm a true believer in standards and would always try to find new ways that can enforce

the use of these standards (e.g. design patterns or tools). Building or using utilities and tools that can help in making better website or software has always been one of my main interests

Graphics & Multimedia

Graphic design was always a main part in my career. When ever I am developing a multimedia project or a website I have to start with computer graphics using Photoshop,Freehand ... etc. Add to that, I have always worked in graphic design environments and I

Have an experience with most of the AD Agencies in Bahrain (Promoseven, Vahid-Contexture, JWT, MEMAC, Visuals, Med-In-A, Artograph, Muharraqi-Studios .. etc)
