To whom it may concern,

I would like to express my interest in an Environmental position. I am a resilient professional Environmental Consultant / Auditor with an extensive background in the Environmental Management industry. With a long-standing record of innovative problem solving, I have developed and executed strategies that will bring value to any organisation. I am an astute problem-solver capable of prioritising and managing complex projects with proficiency. More than 10 years' experience has led me to refine my skills and abilities to include the following:

- Manage environmental projects and compile press releases for media coverage;
- Manage hydrocarbon spill clean-ups;
- Assist Toyota and Hino South Africa in developing Environmental Management Systems;
- Conduct environmental compliance audits which entailed on-site visits, water sampling, analysing samples with laboratory equipment and interpreting results. Compose reports entailing findings and recommendations on methods to reduce environmental impacts;
- Facilitate, assess and moderate workshops regarding environmental awareness, spill response and environmental management to employees; and
- Compile environmental awareness and spill response training manuals.

In my role as Environmental Consultant, I excelled at delegation, communication, time management, team performance and organisational improvements. I am adaptable and focused on new advancements in my chosen field of study. I have proven to be effective and professional, with proficiency in customer service. I enjoy brainstorming and coordinating efforts to achieve a common goal.

The following are relevant qualifications completed that enabled to improve the skills as mentioned above:

- SAMTRAC at NOSA;
- MSc Integrated Environmental Management at University of Bath;
- Registered at Transport Education Training Authority as a Facilitator, Assessor and Moderator;
- Post Graduate Diploma in Advanced Marketing Management at UNISA;
- ISO14001 Implementation at NOSA;
- Short course in Legal Context For Environmental Management Compliance and Enforcement at UNISA; and
- BA Communication Degree at North West University.

As a qualified professional with a background in improving Environmental Management Systems, I am confident I will prove an asset to your company and submit my application for your kind consideration. Feel free to contact me if there is anything else you require.

Sincerely,

Machel Mari Wilson Green
