---

Dear Sir/Madam,

As a seasoned and ambitious professional, I feel that I would be an ideal fit for the role of quality inspector/Engineer. For the last 13 years,

Oil& gas QC Structural – 2021 to current

Steel Structural Fabrication & Erection - 9 Year's

(CNC) Production & Manufacturing– 3 Year's

I have worked in the production, Fabrication & Oil Gas industry and acquired a vast number of immensely useful skills. This is why I truly believe that your company could benefit from having a quality inspector of my caliber.

Presently, I work in an Oil & Gas project QC Inspector Steel Structure for Pipe Racks, STR's and Equipment Structures, Furnace structure's etc. & Preparation of test packages as per P&ID, piping system, isometric Drawing, designs requirement and specification.

Present Company:(N.S.H) Nasser Saeed Al Hajri Corporation W.L.L, BAHRAIN.

Client :Bapco

Contractor :TTSJV (Joint venture of Technip, Tecnicas Reunidas and Samsung)

Project :BMP (Bapco Modernization Program) Project.

It is my long-held belief that a successful quality inspector should be thorough and knowledgeable. That is why I strive to ensure quality and precision on a regular basis. By creating an environment that emphasizes attentiveness and hard work, I feel that many common errors can be avoided.

In short, my skill set and personal qualities would make excellent additions to your department. I have a drive to succeed and the experience necessary to perform this job. I look forward to speaking with you in the future about this role.

Thank you for your time.

Sincerely

Manikandan Essakkimuthu
