Projects

Built an E-commerce API aims to develop a tool that helps developers and start-up business men who tend to develop their business through digital marketing and also help owners to manage their business in a certain domain that focused on Jewelry products for small- and large-scale business.

This tool can provide users with product catalog as well as an e-commerce for online purchase, also a central search engine and recommendation portal to aid general shopper to find store worldwide.

Used HTML, CSS, JavaScript, PHP, SQL as programming languages.

Used Laravel PHP framework v8.0.
