Dear Sir/Madam

Greetings,

With great willingness, I am applying for the position of **Maths teacher/Asst Maths teacher**. I have a master's degree in mathematics. Over the course of my career, I have gained three years of experience. I worked as a teacher in a government school for one year and as an accountant in a group of companies for two years.

I am familiar with both middle school and high school math curriculums. Having experience with ages 5-15 or an equivalent combination of education and experience. Assists parents with activities focused on raising student achievement, parent/school compacts, and parent involvement agreements to support school-wide parent involvement goals. The implementation of a school-wide incentive program for behavior management

I have gained extensive knowledge of the accounting field as a result of my financial position with multiple CR's. The management of financial records, the management of budgets, the assessment of risk, and the conduit for the review of business strategies.

Looking forward to your kind response in this regard

Best Regards

Kainat Fazal
