

Muhammad Talha Qayyum

ELECTRICAL INSPECTOR

Profile

Electrical Associate Engineer with a strong background in troubleshooting and problem solving, specializing in [Specific area]. Expertise in [Specific skills, e.g., electrical design, system analysis, fault finding] and a passion for identifying and implementing effective solutions to complex technical challenges. Eager to contribute to a challenging environment where I can leverage my skills to drive efficiency and innovation.

Work Experience

Carrefour (Majid Al Fatim)

2021-Present

Electrical Maintenance Supervisor

- Analyzed electrical maintenance delays, implementing procedural changes to enhance efficiency.
- Reduced electrical maintenance delays from 10 hours to 2 hours, significantly improving production uptime.
- Established standard operating procedures for electrical maintenance, ensuring compliance and safety.
- Created and refined Preventative Maintenance procedures, enhancing system reliability.
- Developed and executed action plans to minimize electrical delays, improving operational flow.
- Managed the Electronics Repair Lab, overseeing repairs and maintenance of critical equipment.

Intiaz Mall (Hyper Market)

2017-2021

Electrical Maintenance Technician

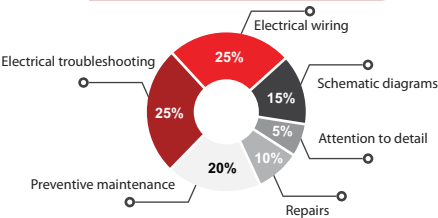

- Perform electrical construction tasks, including the installation of electrical components and equipment, such as wiring, switches, and conduits, and lighting system.
- Install components of electrical systems, such as circuit breakers, transformers, and other protective devices.
- Maintenance of installed asset e.g ice land Freezers, Motion sensors, Three phase Motors, Ventilation Fans, Bone saw Machine, Display Chillers, etc, as per schedule.
- 3-phase Panel work & troubleshoot of panels e.g D.O.L stator, Star-Delta stator.
- Connect wires within a building using transformers, circuit breakers, and numerous other components.
- Assembling, evaluating, testing, and maintaining electrical or electronics wiring, equipment, appliances, and apparatus.

Sohail Engineering (Govt. Contractor Pvt. limited) 2015-2017

Electrician

- Installing new electrical systems, wiring, and equipment, including lighting, outlets, and circuit breakers.
- Writing up reports, safety regulations, and preventative maintenance plans.
- Operating & troubleshooting of 100 KVA generator, and also maintenance of AVR, ATS panels, and sun witches etc.
- Operating & maintenance of single phase & 3-phase Motors. (3HP to 7 PH)
- Troubleshoots of 1-phase & 3-phase electrical wiring.
