PROFESSIONAL EXPERIENCE

ASATEEL LOGISTICS, ABQAIQ, SAUDI ARABIA

Business Development Head/Vice President, 2019 to Present

Responsible for the management of a company that specialises in land rig movements and oil rig supply chain logistics. Authorised to move between Asateel and the parent company, KCT to organise company assets and attend meetings to ensure complete client care while maintaining efficient use of both assets and staff. Manage trading, including investment strategy for new product lines along with negotiating with high level banking executives to restructure company loan repayments. Compose executive summaries for clients and investors as well as presentations and company profiles using standardised corporate branding.

Page Two

Attend Aramco and contractor HSE meetings to ensure compliance with all governmental and client standards. Develop costing analysis for both the individual and multi asset usage, including all direct and indirect costs borne by the operation. Initiated fuel authorisation form; using monitoring and analysis this regulated the use of fuel, resulting in a 30% reduction in spending. Identified and advised on usage of idle company land as key way to produce profit with minimal initial investment. Organised routine visits to existing clients on a more structured basis, followed by a formal reporting system, resulting in 10% increase in profitability. Produced standard format of all operational reporting systems; improving overall use of assets and speed of invoice generation. Implemented and monitored performance of a preventative maintenance programme using previous aviation experience; recording maintenance faults and corrective actions, resulting in 15% reduction of unscheduled downtime.

Selected Contributions:

- Located loss streams and projects using a combination of operational and financial reports. This enabled the development of a new strategy to cut loss-making streams and to implement efficiencies elsewhere.
- Drove safety awareness through a process of prior to use inspections before leaving the site and correct implementation of GPS tracking according to Saudi Aramco compliance.
- Sourced, recruited, trained and mentored key managerial staff.

OES ASSET INTEGRITY MANAGEMENT, AL KHOBAR, SAUDI ARABIA

Operations/Office Manager, 2015 to 2019

Managed 27 permanent inspectors and 5 permanent multi-national office-based staff members, ensuring they follow safe operational practices. Managed Saudi Arabian office operational budget; cost comparison to reduce operational expenditure. Managed technical, reporting, HR, and QA/QC departments of the company in various locations around the world to complete projects in given time frame. Communicated with new and existing OES customers to discuss potential issues related to planned inspections. Investigated and recorded incidents/accidents. Promoted and upsold OES services during pre-mobilisation meetings. Produced quotations for sale of technical services supplied by OES as required by clients.

Selected Contributions:

- Directed cross-functional team of 65 inspectors, including onshore, offshore, and office staff to manage and complete assigned tasks.
- Supervised 27 permanent inspectors for managing accurate mobilisation to numerous land rigs across KSA as well as successfully undertook a Saudi Aramco Audit.
- Enhanced multiple contracts with USD 1.5M value by delivering exceptional services.

ENSCO PLC, EASTERN PROVINCE, SAUDI ARABIA

Mechanical Technician, 2014 to 2015

Supported the Chief Mechanic in identifying faults, rectification and the servicing of EMD 645 marine engines to streamline rig operations. Performed servicing, maintenance, and husbandry on various pieces of rig equipment as per the schedule. Managed planned maintenance and rectification on TEMPSC (survival craft), and fast rescue craft. Maintained essential systems; including reverse osmosis water makers, fuel purifiers, sewage treatment plant and oily water separators to ensure operational efficiency. Prepared well written work reports and identified areas for improving the efficiency of processes. Showed continued commitment to Ensco's high standard of health and safety.

Selected Contributions:

- Maintained zero incident record during whole employment by following SOPs, rules, and guidelines of health and safety standards.

BAE SYSTEMS/ROYAL SAUDI AIR FORCE – AL KHOBAR, SAUDI ARABIA

Gas Turbine Technician/Technical Trainer, 2005 to 2014

Performed scheduled servicing and maintenance of Rolls Royce RB199 ECU and KHD SPS system. Inspected the compressors; turbines, guide vanes, and combustion chambers using boroscopic equipment. Identified faults of the RB199 and KHD SPS system and rectified in a timely manner to maintain operational efficiency. Provided removal, installation, and testing services of whole installed ECU components, such as fuel control units, nozzle control units, and
