## Professional Summary

Results-driven .NET Backend Developer with 5 years of experience in designing, developing, and maintaining scalable applications using C#, .NET, and Microsoft SQL Server. Strong expertise in object-oriented programming, database management, containerization, and Agile/Scrum methodologies. Proven track record in deploying containerized applications to cloud platforms and managing development environments. Adept at collaborating with cross-functional teams to deliver high-quality software solutions on time. Passionate about writing clean, efficient code and continuously improving system performance.

## Skills

- **Languages:** C#, SQL, Java, HTML, CSS
- **Frameworks & Technologies:** .NET, .NET Core, SignalR, Entity Framework
- **Databases:** Microsoft SQL Server, PostgreSQL, MongoDB
- **Development Tools:** Rider, Git, Docker, GitHub Actions, Postman, ApiDog, NGROK
- **DevOps & Deployment:** Docker containerization, Heroku deployment, container orchestration, NGROK tunneling for development environments
- **Methodologies:** Agile/Scrum, Object-Oriented Programming (OOP), RESTful APIs
- **Soft Skills:** Problem-solving, teamwork, communication, time management, Testing

## Experience

MARCH 2022 - PRESENT

### Chithub Company LTD, Abuja, Nigeria – *Senior Backend Developer*

- Developed and maintained high-performance backend services using C# and .NET Core, improving system efficiency by 40%.
- Containerized backend applications using Docker, creating optimized multi-stage builds that reduced image sizes by 60% and improved deployment consistency across environments.
- Deployed Docker containers to Heroku cloud platform, implementing CI/CD pipelines for automated builds and deployments, reducing deployment time by 50%.

- Configured and deployed applications to personal servers, utilizing NGROK for secure tunneling and remote access during development and testing phases.
- Implemented Docker Compose configurations for multi-container applications, orchestrating database, cache, and application services for seamless local and production environments.
- Collaborated with Agile/Scrum teams to deliver features in two-week sprints, ensuring timely project completion.
- Developed responsive email templates using HTML/CSS, ensuring cross-client compatibility (Outlook, Gmail, Apple Mail), which improved user engagement by 30% and reduced spam filter rates.
- Collaborate with product managers, UI/UX designers, and frontend developers to define project requirements and timelines.
- Ensure the implementation of robust security measures in backend systems, including data encryption, authentication, and authorization.

MARCH 2022 - PRESENT

**Chithub Company LTD, Abuja, Nigeria** – *Hardware Installation Technician*

- Configure ANPR cameras and set up networking to ensure seamless communication between multiple devices.
- Install and configure an FTP server on the processor (mini-computer) to facilitate efficient data transfer.
- Provide remote access for support and troubleshooting while also handling onsite maintenance and diagnostics of hardware devices to ensure optimal system performance.
- Conducted code reviews and provided technical support to enhance team productivity.

JULY 2019 - FEBRUARY 2022

**Application Laboratory, Abuja, Nigeria** – *Backend developer*

- Developed and maintained backend solutions using .NET, ensuring scalability and performance..
- Designed and implemented APIs, database structures, and authentication systems.
- Utilized Docker for containerizing applications, ensuring consistent development and production environments.
- Set up local development environments using NGROK to expose local servers for testing webhooks, third-party integrations, and mobile application development.
- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Mentored interns throughout their internship, guiding them in software development best practices and professional growth.

## Education

MARCH 2014 - MARCH 2018

**University of Cross River, Calabar, Nigeria** – *B.Sc. Computer Science*

- Google Developer Student Clubs Lead | 2018

## Certifications

- C# Basics Certification from Udemy
- Android Development Intermediate Bundle Certification from Andela Learning Community (ALC).
- ASP .NET Core Web API on (Udemy)
- Docker and Kubernetes Practical Guide (Udemy)
- Docker for .NET Developer (Udemy)
- Domain Driven Design and Clean Architecture
