To whom it may concern,

Hope this letter finds you well!

My name is Mustafa Nazzal, I am an Engineering graduate from Sh. Khalifa Institute of Technology (High School) with a Diploma of Industrial Electronics and a Certificate of Automotive Engineering. I am currently working in Sultan Center as a Cashier and have also worked in Customer Care and Operations in Get Baqala. In addition, I have worked in well-known Bahraini companies for the last four years, such as Fakhro Group, Al Zayani, and Horizon for Telecommunication.

Due to my previous job experiences, I have learned that I could push myself beyond my capabilities and what 's expected, I got to challenge my patience, strength and other skills that created a positive influence on where I am today. I had the chance to lead a team of 14 members and supervise their work. However, I still believe that there is a room for improvement and creativity and hopefully I can gain that and more at the esteemed company you are connecting me with.

Looking forward to your positive response.

Yours Sincerely,

Mustafa Mamoon Nazzal
