Director, Human Resources

Dear sir/madam,

As a highly motivated and dedicated citizen with strong communication and interpersonal skills, I would like to express my interest in a job opportunity with your company. I believe my skills and experience make me an ideal candidate.

I've finished a Bachelor degree in chemical engineering, majoring in petroleum refinery engineering and environmental engineering. My coursework and campus involvement have prepared me well for this position.

- **Coursework:** After completing courses in software development methods, programming languages, and network systems, I have had an experience with Aspen HYSYS, Aspen Plus, Chemcad, MATLAB, Microsoft Office, Excel, Python, and SPSS. This knowledge will be an asset to this position.
- **Campus involvement:** As a student I have been extensively involved in my university community, which has allowed me to develop strong interpersonal skills. My involvement in various events, including engineering week and sports carnivals, in addition to my memberships in the SPE and AIChE student chapter at my university, has allowed me to work closely with my peers while supporting the university community as a whole.

I believe that I have a lot to offer your company. I am keen to develop my professional skills and look forward to discussing my application with you at an interview.

Please find my CV attached, thank you for your consideration.

Sincerely,

Mohammad I.A. Bargo
