

Greetings,

As a successful, experienced IT Professional with advanced knowledge in Networking, seeking to handle increasing responsibilities and challenging assignments to expand my technical and non-technical skills, education, and achieve recognition. I want to be part of an organization where my skills are utilized effectively and nurtured to contribute significantly to the betterment of such an organization.

I have extensive knowledge in IT and Networking with hands-on and management experience in all technical aspects. Eleven years of experience in the field of Information Technology and Networking, with exposure in Installation, Maintenance, Repair, or General Repair in Desktops and Servers. Advance knowledge in Setup and Configuration of Routers Switch or Hub, Firewalls, AP's, CPE, P2P, CCTV's or IP Cameras. Seven years of management experience including mid-level position, highly qualified in Network Administrator, Telecom Network Engineer, System or IT Administrator, and IT Supervisor or Manager. Proven flexibility in different industries, worked in Electric Cooperative Inc., University, BPO's, and US Government Project.

I look forward to being a part of your workforce and willing to interview in person, on Skype, or Phone at your convenience.

Sincerely,

John Paul B. Morata
